Please amend claim 1 to read as follows:

1. (Twice Amended) An interactive computer controlled
display system with speech command input recognition
comprising:

 means for predetermining a plurality of speech commands
for respectively initiating each of a corresponding
plurality of system actions,

 means for providing for each of said plurality of
commands, an associated set of non-command speech terms,
each term having relevance to its associated command,

 means for detecting speech command and non-command
speech terms,

 means responsive to a detected speech command for
displaying said command, and

 means responsive to a detected non-command speech term
having relevance to one of said commands for displaying the
relevant command simultaneously with said detected speech
command.

Please amend claim 6 to read as follows:

1   6. (Twice Amended) A method for providing speech command
2   input to an interactive computer controlled display system
3   with speech command input recognition comprising:
4   predetermining a plurality of speech commands for
5   respectively initiating each of a corresponding plurality of
6   system actions,
7   providing for each of said plurality of commands, an
8   associated set of non-command speech terms, each term having
9   relevance to its associated command,
10   detecting speech command and non-command speech terms,
11   displaying a speech command responsive to its detection
12   as a speech command, and
13   responsive to a detected non-command speech term having
14   relevance to one of said commands displaying the relevant
15   command simultaneously with said detected speech command.

Please amend claim 11 to read as follows:

1 11. (Twice Amended) A computer program having program code
2 included on a computer readable medium for speech command
3 input recognition in an interactive computer controlled
4 display system comprising:
5   means for predetermining a plurality of speech commands
6 for respectively initiating each of a corresponding
7 plurality of system actions,
8   means for providing for each of said plurality of
9 commands, an associated set of non-command speech terms,
10 each term having relevance to its associated command,
11   means for detecting speech command and non-command
12 speech terms,
13   means responsive to a detected speech command for
14 displaying said command, and
15   means responsive to a detected non-command speech term
16 having relevance to one of said commands for displaying the
17 relevant command simultaneously with said detected speech
18 command.
